## CUSTOMER SERVICE INSPECTION

- I. Purpose. The Goforth Special Utility District is responsible for protecting the drinking water supply from contamination or pollution which could result from improper plumbing practices. The purpose of this service agreement is to notify each customer of the plumbing restrictions to insure the public health and welfare. Each customer must sign this agreement before Goforth Special Utility District will begin service. In addition, when service to an existing connection has been suspended or terminated, the water system will not re-establish services unless it has a signed copy of this agreement.
- II. Plumbing Restrictions. The following undesirable plumbing practices are prohibited by state regulations.
- A. No direct connection between the public drinking water supply and a potential source of contamination is permitted. Potential services of contamination shall be isolated from the public water system by an air-gap or an appropriate backflow prevention device.
  - B. No cross connection between the public drinking water supply and a private water system is permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device.
  - C. No connection which allows condensing, cooling, or industrial process water to be returned to the public drinking water supply is permitted.
  - D. No pipe or pipe fitting which contains more than 0.25% lead may be used for the installation or repair of plumbing at any connection which provides water for human use.
  - E. No solder or flux which contains more than 0.2% lead can be used for the installation or repair of plumbing at any connection which provides water for human use.
- III. Service Agreement. The following are the terms of the service agreement between Goforth Special Utility District and \_\_\_\_\_ GSUD Customer.
- A. The water system will maintain a copy of this agreement as long as the customer and/or the premises is connected to the water system.
  - B. The customer shall allow the property to be inspected for possible cross-connections and other undesirable plumbing practices. These inspections should be conducted by the water systems or its designated agent period to initiating service and periodically thereafter. The inspections should be conducted during the water system's normal business hours.
  - C. The water system shall notify the customer in writing of any cross-connection or other undesirable plumbing practice which has been identified during the initial inspection or the periodic reinspection.
  - D. The customer shall immediately correct any undesirable plumbing practice on the premises.
  - E. The customer shall, at his/her expenses, properly install, test, and maintain any backflow prevention device required by the water system. Copies of all testing and maintenance records shall be provided to the water system.
- IV. Enforcement. If the customer fails to comply with the terms of the Service Agreement, the water system shall, at its option, either terminate service or properly install, test, and maintain an appropriate backflow prevention device at the service connection. Any expenses associated with the enforcement of this agreement shall be billed to the customer.

Location of Service \_\_\_\_\_

I \_\_\_\_\_, upon inspection of the private plumbing facilities connected to the aforementioned public water supply do hereby certify that, to the best of my knowledge:

	Compliance	Non-compliance
(1) No direct connection between the public drinking water supply and a potential source of contamination exists. Potential sources of contamination are isolated from the public water system by an air gap or an appropriate backflow prevention assembly in accordance with state plumbing regulations. Additionally, all pressures relief valves and thermal expansion devices are in compliance with state plumbing codes	<input type="checkbox"/>	<input type="checkbox"/>
(2) No cross-connections between the public drinking water supply and a private water system exists. Where an actual air gap is not maintained between the public water supply and a private water supply, an approved reduced pressure-zone backflow prevention assembly is properly installed and a service agreement exists for annual inspection and testing by a certified backflow prevention device tester.	<input type="checkbox"/>	<input type="checkbox"/>
(3) No connection exists which would allow the return of water used for condensing, cooling or industrial processes back to the public water supply	<input type="checkbox"/>	<input type="checkbox"/>
(4) No pipe or pipe fitting which contains more than 0.25% lead exists in private plumbing facilities installed on or after July 1, 1988.	<input type="checkbox"/>	<input type="checkbox"/>
(5) No solder or flux which contains more than 0.2% lead exists in private plumbing facilities installed on or after July 1, 1988.	<input type="checkbox"/>	<input type="checkbox"/>
(6) No plumbing fixtures is installed which is not in compliance with state approved plumbing code.	<input type="checkbox"/>	<input type="checkbox"/>

Water service shall not be provided or restored to the private plumbing facilities until the above conditions are determined to be in compliance.

I further certify that the following materials were used in the installation of the plumbing facilities.

Service lines: Lead <input type="checkbox"/>	Copper <input type="checkbox"/>	PVC <input type="checkbox"/>	Other <input type="checkbox"/>
Solder: Lead <input type="checkbox"/>	Lead Free <input type="checkbox"/>	Solvent Weld <input type="checkbox"/>	Other <input type="checkbox"/>

I recognize that this document shall become a permanent record of the aforementioned Public Water System and that I am legally responsible for the validity of the information I have provided.
